SUMMARY

Backend-leaning software engineer with 6 years of experience building async APIs, data pipelines, and internal tooling. Comfortable across Python, TypeScript, and Postgres, with a focus on shipping reliable systems and clean documentation. (This is a dummy CV generated for testing document upload/parsing.)

EXPERIENCE

Senior Backend Engineer — Northwind Data Co.

Austin, TX | Mar 2022 - Present

- Designed and shipped an async document-processing pipeline (FastAPI + RQ + Postgres) handling CV/resume ingestion, OCR, and structured-data extraction for ~40k documents/month.
- Cut p95 API latency by 38% by moving heavy enrichment work off the request path and into background workers with SSE-based status streaming to the frontend.
- Mentored 2 junior engineers and led migration of a legacy sync-only job queue to an async, retry-safe architecture.

Software Engineer — Fenwick Analytics

Remote | Jul 2019 - Feb 2022

- Built internal REST APIs and a React dashboard used by ~200 analysts daily to review enrichment and matching results.
- Implemented vector-similarity search over candidate documents using embeddings, improving semantic search relevance.

EDUCATION

B.S. in Computer Science — University of Texas at Austin

Graduated May 2019

SKILLS

Python, TypeScript/Next.js, FastAPI, PostgreSQL, Redis/RQ, SQLAlchemy, React Query, Docker, pytest/vitest, REST & async API design.
